

LOWLIFTERS

PICCOLO/PRESTO/DOPPIO PLL/PLP/PSD

A WHOLE FAMILY OF TRUCKS FOR EFFICIENT LOADING,
UNLOADING AND TRANSPORT.

ATLET

High availability

High availability is one of Atlet's strong points. From the outset, our trucks are developed to be reliable and long-lasting. They are

basically modular, with many common design solutions. Our entire service concept is based on the fact that our trucks must be

dependable and economical. To be on the safe side, you can also sign an uptime contract, which will bring you nearer to 100%.

Three models. Infinite possibilities.

Atlet's new family of pallet trucks enables you to build a comprehensive truck fleet that will meet every possible need. And with the whole Atlet organisation

behind you, you will have a handling system combining maximum possible availability with safe economic operation.

ATLET Presto, gains time and efficiency. Loading and unloading in confined spaces, on uneven surfaces and high speed for long transportation.

[Safe Solution]

A PALLET TRUCK FOR EVERY OCCASION

Atlet's new family consists of three genuine, technically advanced pallet trucks: Piccolo, Presto and Doppio. Three pallet trucks with three different characters: One which is small and nippy; the big brother – quick and strong; and the middle brother, which can take twice as much. Three different pedestrian pallet trucks for three different types of loading, unloading and transport.

Think first

Now you can choose the low lifter that best suits your particular needs. Together with Atlet you

can specify and analyse what you require from your materials handling system. You then use

the result to choose which pallet truck or trucks you need for your operation.

Not too big. Not too small.

The Piccolo is the versatile little pallet truck for confined spaces and short cycles. Presto is the powerful ride-on truck with high capacity and speed. The Doppio,

with its double forks, handles and lifts two pallets at once.

ATLET Doppio, works twice as fast. Two pairs of forks manage twice as much. Good availability and precise two level handling.

ATLET Piccolo, indispensable in really tight spaces and for short cycles. On the lorry, on the loading bay, in the shop and in small stores.

[Safe Driving]

FAMILY FEATURES

Atlet's trucks share common components. Fewer, high quality modules, minimizes stoppages and guarantees high availability. New models are designed and built using proven modules. This is evident in the new Atlet family, where the three models have common features.

New tiller arm with control panel

A new ergonomically designed tiller arm provides safe and secure control of the truck. Equally suitable for right-handed and left-handed drivers. Clear back-

ground-illuminated LCD display with information on battery status, hours-run meter, date, clock and warning messages. The ATC control computer has

built-in service functions such as fault log, temperature logs, monitor functions, diagnosis, calibration and performance adjustment.

Constant ground contact – Friction Force

The patented linkage design, ensures that every wheel – and especially the drive wheel – always has ground contact.

The truck always carries the load securely and safely, even on bumpy surfaces and ramps. The design also makes the trucks

stable and firm laterally, although they are relatively narrow.

Responsive and lively – AC motor

The AC motor ensures that the truck responds to the slightest command from the driver, while

every braking movement generates more current for the battery. This gives the motor maximum

efficiency and allows the operator total control of the acceleration and braking even on slopes.

PICCOLO Small, versatile, reliable and ergonomically designed.

The narrow, nimble Piccolo has a strikingly tight turning circle and negotiates slopes and ramps with ease. The asymmetrically positioned tiller arm lets you drive the truck simply and safely, without any great effort, wherever you like. You can walk either behind the truck or beside it. The slender new design makes it extremely easy to get into and out of the smallest and tightest spaces safely. If there's room for a pallet, the Piccolo can reach it easily.

In the world of music Piccolo means little, smooth and easy.

DOPPIO Twice as much. Quick and manoeuvrable.

The Doppio is the middle brother in the family. With one pallet on the forks and one on the straddles, the Doppio can handle two pallets at once. Strong and compact the Doppio will optimise loading and unloading at two levels.

Doppio stands for twice over.

PRESTO Quick, strong and safe to drive.

The Presto is the pride of the family. It is a ride-on pallet truck that will make loading, unloading and transport much more efficient. Servo is standard on the Presto 250. Powerful and quick, with new side guard and a rigid platform on which you will feel steady even at high speed. The low chassis prevents feet from being trapped and the slender design enables the truck to manoeuvre in tight spaces. The Presto's five-wheel design combined with Friction Force gives both great lateral stability and excellent traction.

The Presto comes in two different sizes. PLP lifts 2 000 kg and does 10 km/h at its fastest. PLP 250 is a heavy duty version with a capacity of 2 500 kg and does 12 km/h at its fastest. Battery capacity up to 600 Ah.

To a musician, Presto means “quick” and “ast”.

The truck body goes all the way down to the floor, reducing the risk of trapped feet etc.

An ingenious feature is that the battery is mounted on small wheels for a quick battery change.

Atlet has a wide selection of models for all handling in and around the reception area. Quick, safe internal transport,

efficient and time-saving handling on the loading bay. Or smooth loading and unloading from the ground. For walking,

stand-on or sit-on drivers. From sporadic low-frequency use to intensive multi-shift handling calling for high capacity.

Atlet Ergo ALL Stand-on low lifter

Ergonomic transporter for long distances and a high goods flow.

Atlet Ergo XLL Sit-on low lifter

Lowlifter version specially designed for long distance, intensive transportation.

[Safe Operation]

HIGHEST AVAILABILITY

Are you satisfied with your truck fleet? Does your material handling system break down? Let Atlet look after your materials flow and your trucks. Not only do our trucks combine modular design and proven technology, we also have a unique service concept. That's how Atlet can give you the highest availability. As near 100% uptime as you can get.

Atlet has the fastest and most reliable after-sales service on the market. Not only for our own trucks, but also for any other make. Our skilled service engineers solve 98% of all conceivable problems at the very first visit – we've got the records to

prove it. Our trucks are developed on common platforms of tried and tested moduls and technological innovation. Atlet has the expertise, the technology and the concept to succeed with material handling systems.

Take a look at www.atlet.com, click on service and read more about the maintenance contract best suited to your fleet. Let us look after your trucks – you'll be glad not to have the hassle, you can count on that.

Safe Solution guarantees the right model for your needs.
Safe Operation means the reliability that means economy.
Safe Driving prevents accidents and damage.
